About your Razer BlackWidow Keyboard

Congratulations! You have purchased the best keyboard in the market today!

A Razer BlackWidow keyboard provides the functionality of a traditional keyboard, but with customizations for any kind of user.

System Requirements

Requirements for the keyboard to work properly.

Hardware Requirements:

- PC with a free USB port

Razer Keyboard Requirements:

- Windows 7 64-bit (or higher)
- Internet connection
- 500MB of free hard disk space

Parts of the Razer Keyboard

The Razer BlackWidow keyboard consists of the following components:

Part	Description
Keyboard	The actual keyboard
USB Cable	The cable for connecting the keyboard to a computer

Connecting to a Computer

Your keyboard requires a USB connection to your machine.

To connect to a computer:

1. Insert micro-USB end of the cable into the keyboard.
2. Insert USB end of the cable into a USB port on a computer.

Customizing your Keyboard

Your keyboard can have customizations for each key.

To edit the settings of a keyboard key:

1. Download and install Razer Synapse.
2. Open Razer Synapse.
3. Select Keyboard > Customize.
4. Select a key to configure on the keyboard image.
5. Press any key combination to bind to the selected key.
6. Select Save.
